**H** = height  
**L** = length  
**P** = projection  
**W** = width  
**ID** = inside diameter  
**OD** = outside diameter

**SAMPLE SET-UPS:**

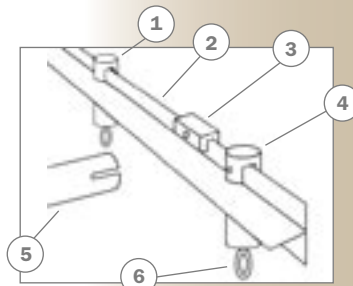

# Archi-T-Rail

Vesta's Archi-T-Rail collection is a uniquely engineered contemporary track system. The ingeniously machined brackets support the special "T" rail without obstructing the flow of the gliders. The 3/16" rail is exclusively designed for light weight treatments while the larger 1" rail may accommodate medium weight treatments. Both track widths are in stock and the 1" rail is now available in three finishes.

**COMPONENT SPOTLIGHT**

The illustration at right details the different components involved in a typical Archi-T-Rail installation. The bracket (5) is first affixed to the wall and then the T-Track (2) is inserted into the bracket's slot. A set screw on the bottom of the bracket will hold the track in place. Next you slide on all your gliders (1). Deco plates (3), if used, are slid into place in front of your bracket positions and held in place with set screws. End stops (4), if used, are placed on the ends of the track and locked into place with set screws.
